Education

Indian Institute of Technology (IIT) Guwahati

B.Tech in Chemical Engineering; Minor in Computer Science — CGPA: 8.65/10

2024 – Present

Guwahati, India

Experience

Web Developer Intern — Ayush Upchar

Aug. 2025 – Oct. 2025

Technologies: Shopify CLI, Node.js, JavaScript

Remote

- Identified 1.5 MB+ of unused JavaScript and 45 KB of unused CSS and eliminated render-blocking resources, improving frontend load performance, by auditing the site with Google PageSpeed Insights.
- Reduced page load time by 6s on mobile and 3s on desktop and improved user retention, by optimizing images/fonts, deferring JS, and removing bloated apps using Shopify CLI and Node.js.
- Raised Core Web Vitals and SEO scores to 90+/75+ and increased organic search visibility, by implementing a lightweight Shopify Online Store 2.0 theme and semantic HTML.

Projects

Velora — Corporate Mobility Optimization Engine

Jan. 2026 – Mar. 2026

C++, Django REST, React.js, ALNS, Kriti 2026

- Cut fleet routing costs 57.65–79.86%, by building a C++ CVRPTW engine using Solomon I1 + ALNS.
- Hit sub-10ms insertion / 111ms worst-case for real-time re-routing, via forward-time propagation.
- Shipped full-stack platform, via Django REST API, React.js dashboard + road-snapped geometries.

Alcher Store — Alcheringa Merchandise Platform

Dec. 2025 – Jan. 2026

Next.js 15, Payload CMS, NextAuth, MongoDB

- Served 5K+ fest users at 99.9% uptime, by building an e-commerce store on Next.js 15 + Payload CMS.
- Cut unauthorized access to zero across 3 roles, by adding Google OAuth sign-in via NextAuth.
- Cut order-processing time 40%, by engineering the admin dashboard + MongoDB schemas.

Vogue Nation Portal — Event Registration Platform

Oct. 2025 – Nov. 2025

Django, SQLite, Google OAuth 2.0, Tailwind CSS, GSAP

- Onboarded 140+ users across 35+ teams, via Django + SQLite + Google OAuth 2.0.
- Enabled dynamic team creation, cutting manual entry 60%, via Django ORM, formsets + signals.
- Delivered responsive UI at 100% uptime, by deploying with Gunicorn + Whitenoise (Tailwind + GSAP).

Udgam 2026 — Official Summit Website

Dec. 2025 - Jan. 2026

React, React Router, Tailwind CSS, JavaScript, Vercel, GoDaddy

- Built official frontend for 10K+ football summit, using React, React Router + Tailwind CSS.
- Cut layout bugs across 3 device classes, by building responsive flexbox layouts + media queries.
- Reduced re-renders 30%, improving maintainability, via modular reusable React architecture.

Achievements

- **Institute Merit Scholarship** (~Rs. 2.08 Lakhs) awarded for highest academic standing in the department.
- **JEE Advanced 2024**: Secured AIR 5103 among 180,000+ qualified candidates.
- **Codeforces Specialist** (Max Rating 1555); Global Rank 745 among 20,000+ participants in Round 1100.
- **UPSC NDA-153**: Ranked in top 641 among 500,000+ candidates; shortlisted for SSB Interview.

Technical Skills

- **Languages**: C++, Python, JavaScript, Java, SQL, C
- **Frameworks & Libraries**: React, Next.js, Tailwind CSS, Django, Node.js, Payload CMS
- **Tools & Concepts**: Git, GitHub, MongoDB, SQLite, Google OAuth, MATLAB, Data Structures & Algorithms, OOP, DBMS
